

The Sales Aid for Carlson Filtration Distributors

Improved 12" CarLent Lenticular Module Design

The latest stage in our continuing investment programme at Barnoldswick takes the form of new tooling for 12" CarLent lenticular modules.

The new 12" tooling enables us to incorporate heavier depth filter media in the popular 12" format, including the 60% high performance activated carbon grades. Previously these heavier grades were only available in 16" modules. Among many applications, this important development now allows customers to use CarlCarb activated carbon depth filter sheets in the growing market for purification of fine chemical and pharmaceutical products.

All other aspects of the module design will remain as before so the new module can be incorporated directly into current housings.

If you would like any further information about the improved 12" CarLent lenticular module, please see www.carlson.co.uk or contact sales@carlson.co.uk.

INVESTOR IN PEOPLE

ACHEMA 2012

30th World Exhibition Congress · Frankfurt am Main · 18 – 22 June 2012
Chemical Engineering · Environmental Protection · Biotechnology

ACHEMA, Europe's leading chemicals and pharmaceuticals trade show will be held in Frankfurt am Main from 18th to 22nd June 2012.

Carlson will be featuring its all-new exhibition stand (shown left) along with a selection of the latest developments in our product range on **Stand E18 in Hall 5.1**. The main product groups featured will include:

- CarLent lenticular filters
- CarlCarb activated carbon filters
- CarlCart cartridge filters

Please contact Sandra Driver (sandrad@carlson.co.uk) for a guest pass voucher number if you would like to visit us at the show. More information is available about ACHEMA at www.achema.de.
